

FAX-235

Unique Brother Features

- **Key Lock System**
enables the machine to cease sending fax/making a phone call/copy when key-lock is activated, using 4 digit password.

- **Anti-Junk Function***
enables you to prevent unwanted Junk Fax or Call by storing the number in the station memory. This saves paper by not printing out unwanted junk faxes.

- **Night Mode**
receives incoming fax calls without ringing.

- **Anti-Curl System (ACS)**
flattens paper and prevents annoying curling problems.

- **"Smoothing" Enhanced Image Resolution**
removes the rough edges from text and makes incoming documents easier to read.

- **Auto CNG Tone Detection**
makes automatic fax reception without pressing START key when you pick up the handset.

- **Multiple Resolution Transmission**
sends individual pages with different resolutions all in one transmission.

- **On-Screen Programming**
provides error-free operation.

- **Help Key**
provides you with information on how to perform settings for a function, or how to obtain basic information for sending or receiving fax.

- **Enhanced Remote Activation**
allows you to transfer a fax call from single line phone extension in the house.

- **Hold On Music**

- **Caller ID Ready*/Caller ID Log***

- **Distinctive Ring Detection***

* Please check with local phone company for the availability of these services.
